A ryghte ex-

cellente treatise of Astro-
nomie, made in the Tus-
cane or Italian tongue, by mai-
ster Antonius De Montulmo, called in
latin Facies cœli, the face of the Heuē
wherin a man may see tofore hand the
mutations of the ayre that shall hap-
pen for this present yeare of our lord
1554, & 1555, next folowynge, declaryng
also what diseases, warres, pestilence,
dearth of victuals shal happen to theyr
that dwelle in the eyght climate vnder
the elenation of the pole Arlike 52.

degrees as the inhabitantes of
the most part of England do
dwelle. Translated into
English by Frederike
van Brunswike.

Imprinted at London, by Tho-
mas Marshe, dwelling in Fleetstreet,
at the sygne of the princes armes.

[The page contains extremely faint, illegible text, likely bleed-through from the reverse side.]

Or asmuche, as
 God whiche is the
 begynnyng of all
 Creatures, (good
 gentle reader) hath
 made man to his
 own similitude and
 likenes, whereby he
 is almoste comparable to the holy An-
 gels of God, who is it then that wyl
 denye that man maye by the disposi-
 tion of the starres prognosticate thyn-
 ges to come, as Berofus Chaldeus wri-
 teth, that holy Noe did vnto the Arme-
 nians & Scythians after the vniuersall
 deluge or floude, wherfore thei called
 hym the partaker of the mind of God.
 Moreover, S. Hierome writeth, that
 what so euer can be comprehended with
 humane vnderstanding is ruled by the
 wheles of the sunne. Wherfore in as-
 muche as bothe the diuine & the prince
 of Philosophers Aristotle in his booke
 de generatione & corruptione conf: sseth
 that propter accessum & recessum solis in
 curculo obliquo fiut generationes & cor-
 ruptiones i mudo sublunari: It foloweth
 that knowynge the disposicion of the
 A. ii. celestial

celestiall bodies, by the whiche all ele-
mentate bodies be ruled, that we men
may by the science of Astronomie (whi-
che science Petrus Laneracensis cal-
leth worthily naturall theologie) pro-
gnosticatynge as is also sayd thyngs to
come, as mutations of the ayre, pesti-
lences, and al other infirmities, warre
penurie, peace, or plentie of victuals,
whiche depende of the heavens as se-
conde causes of God, to suche effectes,
appoynted wherfoze (good gentill rea-
der) the premisses beyng wel pensed, I
desyre the not to take all thynges that
shall bee prognosticated in this yeres
prognostication and the next yeres pro-
gnostication as contingentes of fatall
necessitie, but that it shall chauce,
if god doo not forbyd, thus

I bydde thee well
to fare.

The first Chapter.

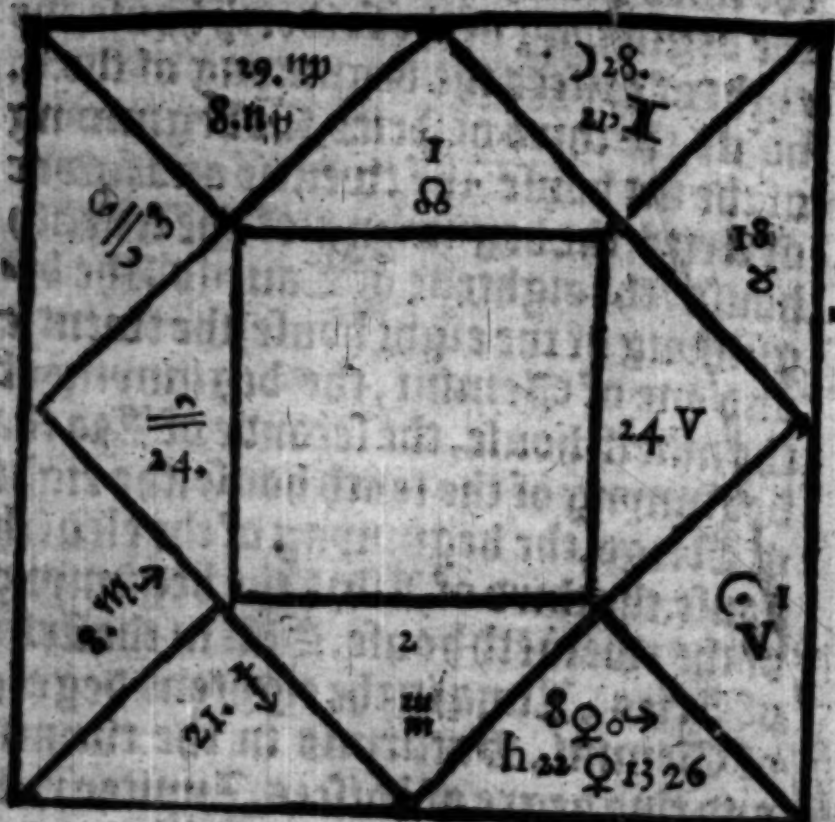

Considering firste the enter-
 ting of the Sonne into
 the firste minute of the head
 of Aries, in the ninth sphere
 whiche is the firste begin-
 nyng of our yere Astronomical, I find
 the twentieth and fower of Libra ascen-
 dent, the eightene of Scorpio, the begin-
 nyng of the seconde house, the twentieth
 and one of Sagitari the beginnyng of
 the thirde house, the second of Aquarius
 the beginnyng of the fowerth house, the
 eight of Pisces the beginnyng of the .v.
 house, the thirde of Aries, the beginnyng
 of the first house, the twentieth and fower
 of Aries the beginnyng of the seventh
 house, the eightene of Taurus, the be-
 ginnynge of the eight house, the twentieth
 and one of Gemini, the beginnyng of
 the ninth house, the seconde of Leo the
 beginnyng of the tenth house, the eight
 of Virgo, the beginnyng of the eleuenth
 house, the thirde of Libra the beginnyng
 of the twelvethe house, Soll in the firste
 of Aries, Luna in the eightene degree
 of Gemini, Saturnus in the twentieth
 and two degree of Pisces, Jupiter. xxix.

A.iii.

of

of Virgo retrograde. Mars the.xviii.
 of Pisces, Venus in the xiii. of Pisces,
 Mercurius in the eighte of Pisces, I
 take vpon this figure, Mercurius to be
 the lord of the first quarter of the yere,
 vntill the Sunne entre vnto the first of
 Cancer, whiche shalbe the.xii. of June
 this yere, and I make Venus parta-
 ker with hym. Wherefore as for the di-
 sposition of the aire, it shalbe rainy and
 stormie, specially the moste parte of all
 Marche nexte, and greate windes, and
 in Aprill next haile, specially about the

nineth

nineth of Aprill many daies before and
many daies after the daie aforesaid.

And in Maie rainie and windie, special-
ly the first weeke before Whitson daie.

Thus I haue generally touched the di-
sposicio of the first quarter of this yere.

The seconde Chapter, of the
disposicion of the next quarter A-
stronomicall, beginnyng the .xiii.

of June twentie and two mi-
nute after .vii. of the clocke

in the Mornynge.

The figure of the whole heauen,
shalbe thus, the degre ascendent,
the fifteth of Leo, the twentie and
fower of Leo, the seconde house, the fo-
werteneth of Virgo, the beginnyng of
the thirde house, the thirtene of Libra,
the beginning of the fowerth house, the
twentie and sixe of Scorpio, the begin-
nyng of the fifteth house, the nineth of
Capricorne, the beginnyng of the sixte
house, the fifteth of Aquarie, the begin-
nyng of the seventh house, the twentie
and fower of Aquarie, the beginnyng
of the eight house, the fowertenth of Pi-
scis, the beginnyng of the nineth house,

A. iiii.

the

the seconde quarter before mentioned, who committeth his disposition by a quarter aspect of Saturne, being beyde of the eight house, the house of death, by the whiche it is signified, that there shall be this yere greaue death, and specially this quarter, whiche shall be very hott and drie.

¶ The.iii. Chapter of the third quarter of the yere aforesaid, that is to saie, the entrie of the Sunne into the first minute of Libra, the thirtene of September, eighte houres, fiveteene minutes, fozte secondes after Noone.

The site or figure shall be this of the heauens at the tyme and howe aforesaid, the first of Gemini the ascendent, the thirde of Cancer, the beginning of the seconde house, the thirde, the eightene of Cancer, the thirde of Leo, the fowerth house, the twentie and fiue, of Leo the fift house, the sixte house the eleuenth of Libra the sixte of Sagitari the seuenth house, the thirde of Capricorne the eight house, the. xviii. of Capricorne the nineth house, the. iii.

Venus, and Venus ouer Mars by a
quarte aspecte by the whiche it is signi-
fied that in that quarter aboute the be-
ginnyng shalbe greete thonder, and a-
boute the ende rainie weather.

The fourth chapter of the .iiii.
quarter of the yere of our lord
aforesaid, that is to saie, the
entre of the sūne into the first
minute of Capricorne. xii. hou-
res xlvii. minutes. xxxii. secō-
des after none in the xi. of Dec-
ember the yere aforesaid.

The figure of the heauens shalbee
thus as foloweth, the degree as-
cendente, the ninth of Libra, the
thirde of Scorpio the seconde hous, the
thirde house, the sowerth of Sagittarie
the xi. of Capricorne the beginnyng of
the fourth house, the 17. of Aquarie the
fifth house, the .xv. of Pisces the .vi.
house, the ix. of Aries the seuenth house
the .iii. of Taurus the .viii. house, the
fourth of Gemini the ninth house, the
eleuenth of Cancer the tenth house. 17.

of

of Leo the eleventh house, the sixtene of
 Virgo the twelue house, the Sunne in
 the firste Minute of Capricorne, the
 Moone in the third of Leo, Saturnus
 in the twentieth and fower of Pisces, Ju
 piter in the twentieth and nine of Libra,
 Mars in the eightene of Virgo, Venus
 in the seuentene of Aquarius, Mercu
 rius in the thirtene of Capricorne, by
 this figure I perceiue Venus to be la
 dy and Mercuri her partainer, where
 fore it shal bee moche enclined to Raine
 and winde moste parte of this quarter.

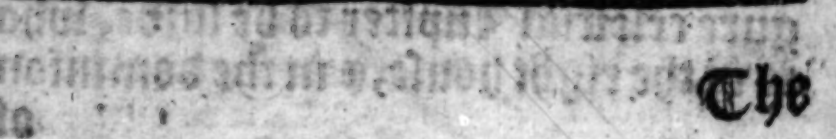

The fyft Chapiter declaryng
the fygure of the heauens at
the eclipse of the sunne, whiche
shall be the yere abouesayde,
xxix. of June vii. houres. xxxi.
minu. after noone.

The first house whiche is cal-
led the ascendent the.iii. of Ca-
pricorne, the.ii. house, the xliii.
of Aquarie, the thirde house,
the viii. of Aries, the eight of Taurus,
the fourthe house, the xvi. of Taurus
the. v. house, the eleventh of Gemini,
the vi. house, the thirde of Cancer the se-
uenth house, the xliii. of Leo the eight
house, the viii. of Libra the ninth house
the tenth house, the eight of Scorpio, the
xvi. of Scorpio the eleventh house the
xi. of Sagittarius the xii. house, the son
in the xvii. of Cancer, y^e moone also in
the xvii. of Cancer. Saturne in the first
degree of Aries, Jupiter in y^e xvii. of
Virgo, Mars in y^e xvi. of Gemini, Ve-
nus in y^e xxix. of Cancer, Mercurius in
y^e xlviii. of Gemini I take bppo this fi-
gure celestial Jupiter to be lord, who
is in the eight house, & in the dominion
of

10-10-1968

The

The figure of the heauens at
the tyme of the Eclipse of the
moon, which shalbe theight of
December xiiii. houres. xx. mi
nutes after noone the yeaere of
our Lorde abouesayd, 1554.

 The degree ascendet the 23.
of Libra, the xvi. of Scorpio
the seconde house: the thirde
house the. xix. of Sagittarie,
the fourth hous the firste of
Aquarius the fifth house the vi. of Pi
sces, the second of Aries the vi. hous, the
senenth hous the xxiii. of Aries theight
house, the xvi. of Taurus, the. xix. of
Gemini the ninth house, the tenth house
the first of Leo, the eleventh the vi. of
Virgo, the xii. house the second of Li
bra, the sonne in the. xxvii. of Sagitta
ry, the moon in the xxvii. of Gemini es
clipsed in the ninth house of the heauens
Saturnus in the 24 of Pisces in the
fifth house, Jupiter in the. xxviii. of
Libra in the first house of the heauens,
Mars in the xvii. of Virgo in the xi.
house of Venus in y xiiii. of Aquari in y
fourth house, Mercurius in y nynt of
Capri

At apptenre in the thirde house, I take
 vpon this figure celestiall Mercurius
 to bee Lorde, and the moone to bee the
 particuler lady of the house of honour
 and kyngdomes, who beyng totally ob
 scured and darkned in the nynt house
 signifieth that there shalbe an occasion
 of vniuersall mourning.

Tb

The particular declaracion of
the wether for this presente yere.

Anno. Domini. 1554.

January.

The firste daie somewhat
enclined to bee colde and
molest, but the trinnalle as-
pect of Jupiter and Mars
exercityng and stirryng by a
Northeast winde will make Snowe:
the seconde daie moze windie and cold
then befoze. The thirde daie faire and
whitthe ruddie cloudes sparkelyng a-
bout the skie, and a strong North east
winde. The fowerth daie very faire,
the winde easterne. The v. at moornyng
very windie, but at a.ri. of the clocke, or
els at midnight, it will thawe the snow
that fell afore. The sixe, cloudie & moist
The seven daie it shalbee thawe. The
viii. somewhat faire in the moornyng, a
small east winde, but aboute. xii. of the
clocke, it will be fairer wether then be-
foze, and all the. ix. daie windie. The. x.
daie somewhat enclined to moisture,
but that is to bee thoughte that the tri-
nall aspect of Sol and Jupiter, beyng
Ozientall, will stirre a Northe East
W. i. winde,

winde, that the effecte of this moisture
shall not appeare. The eleuenth in the
mornynge faire, but afterwarde colde,
and cloudy wether. The twelue daie in
the Mornynge, somewhat windie. The
thirtene daie moze windie then before,
and whitthe clondes sparkeled aboute
the heauen, and all the daie faire. The
fowertene daie faire weather. The. xv.
daie windie, moze then before: The six-
tene somewhat colde, and moist. The
seuentene, colde and moist: The. xviii.
somewhat windie and faire weather.
The ninetene daie fairer and moze
windie: the twentie daie in the mornynge
somewhat windie, and somewhat to-
warde night enclined to coldnesse and
moisture: the like weather the. xxi. daie,
the. xxii. daie temperate wether: the. xxiii.
daie somewhat windie weather: The
xxiiii. faire in the Mornynge, but a litle
before noone and after, colde and rain,
but it wil breake bp, and be faire about
fower a clocke in the after noone, again
the five & twentie daie windie: the. xxvi.
daie colde and clondie till nighte, but
then it will breake bp: The. xxvii. faire
weather, and windie all that daie. The
xxviii. daie clondie, and colde, but about
one

one of the clocke after **M**idnighte, this
weather will chaunge, and it will bee
faire the. xxix. daie, & in the after noone
ware windie: the thirtie daie somewhat
enclined to colde and moiesture, but I
thinke the applicaciō corporall betwixt
Mars & **M**ercurie, will cause windes,
takyng alwaie the said enclination of
moiesture: the. xxxi. daie faire, & windie.

Febuarie.

The first daie of **F**ebuarie very
windie: the secōd a faire daie: the
iii. a colde cloudie daie: the. iiii. a
colde, and somewhat a moiest daie: the
v. windy: the. vi. faire: the. vii. somewhat
colde and moist, and that shall continue
all the eight daie: the. ix. daie faire & some
what windie, but about. ix. of the clocke
at night, this faire wether will chaunge
to a colde, and moist wether: the. x. some
what windie, and cloudie withall: the
xi. daie somewhat windie, & a faire daie
the. xii. daie colde, and cloudie: the. xiii.
somewhat enclined to raine: The. xiiii.
somewhat windie: the. xv. more windie
then before, with showers the same day
and some drisse withall, because of the
Coniunction corporall of **V**enus and
S. ii. **M**ercurius

Mercurius, and Sol, and Mars, with
 an applicacio of Mars vnto Saturne,
 whiche will cause the wether aboue
 said. The sixtene daie somewhat tem-
 peratly colde. The seuentene daie faire
 wether, and sunnie. The eightene daie
 cloudie, and somewhat moist. The. xix.
 daie faire wether. The. xx. daie winde,
 specially in the forenone, but in the af-
 ter Noone, somewhat enclined to driz-
 yng rain. The. xxi. shalbee enclined to
 moisture. The. xxii. faire wether. The
 xxiii. somewhat enclined to moisture.
 The. xxiiii. somewhat enclined to win-
 dinesse and faire wether. The. xxv. shal-
 bee cloudie, and somewhat enclined to
 moisture with Haile. The. xxvi. faire
 weather, and somewhat windie. The
 xxvii. rain and Haile, and a colde daie.
 The. xxviii. daie rain, and Haile, with
 greate coldnesse.

Marche.

The firste daie of Marche some-
 what windie, and at night a cold
 drizlyng Rain, and therefore a
 manne might saie very litle, or none.
 The thirde daie rain and haile, and the
 same shall continue almoste till eighte
 of

of the clocke in the nighte, then it will
bzeake vp. The .v. daie altogether colde
wether, rain, and Haile. The sixt daie
in the after Noone somewhat windie.
The seuenth, Rain, colde weather, and
Haile. The same wether the eight daie
but towarde nighte somewhat faire,
and disposed to winde, and small dris-
lyng rain. The ninth daie greate bla-
stes of windes, keping rain awaie, rain
with some lightenyng and thunder the
tenth daie. The eleuenth daie a litle
winde with rain. The twelueh cloudy
The .xiii, rain, and some Lightenyng
befoze, and aboute Sunne risyng that
daie, and in the after noone faire wea-
ther. The fowertenth daie, because of
the opposition of Mars and Jupiter,
there shal bee rain, and lightenyng, or
thunder. The fuetenth daie somewhat
enclined to moiesture. The firteneh
somewhat Cloudie, colde, and windie
with some showers the seuēteneth daie
The eigheteneth daie, because of the cō-
iuncion of Saturnus, and Venus, be-
ry colde, and greate rain. The ninetēth
daie because of the coniuncion of Sa-
turnus and Marcurius Raine, and
somewhat windie withall, the twentie

B.iii:

and

and. xxi. day rayne : the. xxii. day faire
 weather, and very greate wynde with
 darke cloudes: the xxiii. faire weather.
 the xxiiii. cloude and colde: the xxv.
 daye fayre, and somewhat wyndye:
 the xxvi. daye all the mornynge tyll af-
 ter noone, somewhat colde, cloude and
 wyndye: The xxvii. daye fayre, and a
 stronge wynde, because of the con-
 iunction of Mars and Mercurius,
 in a fyre sygne, that is to say, in Aries.
 the xxviii. fayre: the xxix. a fayre day.
 the xxx. wyndy, and cloude: the xxxi.
 fayre weather.

C Apryll.

The fyrst of Apryll the yere aboue
 sayd a very fayre hotte day: the
 second a temperate daie: the. iiii.
 a fayre daye somewhat hote: the
 fourth day a faire day: the. v. day a faire
 daye: the. vi. daye a fayre day: the. vii.
 viii. ix. days of Aprill, showers shal hap-
 pen with ioyned, or myxed with hayle,
 and temperate wynd: the. x. day faire:
 the. xi. day somewhat disposed to be faire
 with redde the cloudes bringyng, with
 them sometime an Aprill thoure. A faire
 daye

day shall the xii. be: the xiii. day windy.
the xiiii. day colder then it was befoze,
and cloudy: the xv. day a faire day: the
xvi. a faire daye with white and redde
Cloudes, sparkeled aboute the skye:
the xvii. day a fayze day, and somewhat
a wyndye daye: the. xviii. daye more
wynd, and that al the nyght folowynge
till fyne a clocke in the moynynge, in
the xix. of April then colder then befoze
and cloudy: the xx. day wyndye: the. xxi.
day more wyndy then befoze: the. xxii.
daye colde drislyng rayne, with a lytle
wind: the xxiii. somewhat cloudy, but
after one howze after noone wyndye:
the xxiiii. fayze weather: the xxv. some
what wyndye and fayze, and hotte at
nyghte: the xxvi. daye swete shoures,
but after towarde nyghte fayze wea-
ther: the xxvii. wyndye, in the begyn-
nyng, and cloudye towarde nyghte:
the xxviii. in the moynynge, and mooste
parte of the day, wyndy and temperate
weather: the xxix. temperate weather
and the xxx. also, because of the trinall
aspect betwixt Sol, and Jupiter in ter-
restriall signes, whyche causeth tem-
perate brought.

Is iiii

May

Maie.

The first daie faire wether with a temperate winde. The seconde daie somewhat cloudie in the morning, but moste parte of the daie, after faire, and hotte. The thirde daie faire, and windie in the after none. The fowerth daie cloudie, and windie. The fifth daie, faire and hot. The sixth day faire wether. The seventh daie temperate wether. The eight daie somewhat windie. The ninth daie raie, windie with all and haile. The tenth daie faire and somewhat windie. The eleventh windie, colde, and rain with haile. The twelue daie in the fore Noone faire wether. The thirteneth daie somewhat windie. The fowerteneth daie a faire daie. The fifteneeth sweete showers of Rain, with redde and somewhat whitte cloudes sparkled aboute the heauen. The sixtene daie cloudy, and somewhat colder then before. The xvii. daie faire in the morning aboute Sunne rising, but within a hower or two, somewhat disposed to showers of milde Rain. The eighteneeth till it bee noone and passe, windie and faire, but somewhat

what cloudier then befoze, in the after
 noone. The ninereneth faire weather.
 The twentie daie faire, but after none
 cloude. The. xxi. faire, and a breakyng
 vp of the said Cloudes. The. xxi. faire
 and somewhat temperatly windie. The
 xxii. daie faire, but aboute midnichte
 somewhat enclined to moisture. The
 xxiii. faire and somewhat windie all
 that daie and night also, but the. xxi. a
 boute the Sunne risynge cloude. The
 xxvi. faire and clere wether, in the moz-
 nyng, and in the after noone somewhat
 to wind enclined. The. xxvii. and. xxviii.
 daie enclined to faire wether and drie,
 with lightnyng also. The. xxix. the we-
 ther shalbe faire and windie, but thefe-
 with cloude. The. xxx. daie very windy
 the. xxxi. daie windie with cloudes like
 to byng showers, but it shall holde vp.

June.

The first of this monethe shalbe
 faire and temperate wether. The
 seconde windie and temperate.
 The thirde in the moornyng faire, but
 after noone cloude. The foloweth a te-
 perate weather with some winde. The
 fineth cloude, as though it would rain

B.v.

but

but the quarte aspect betwixt Sol and
Jupiter wpll take it awaye: the sixte
daye greate wyndes with rayne and
haye: the seuen th daye wyndye: the
eyght day in the moorninge sayre, but
about after noone rayne and haye: the
nynthe daye drye and somewhat wyndy.
the tenth daye, and somewhat hotter
then before: the eleuenth shall be a cold
and moyste daye. And you shall haue
aboute the xii. of June aforesayd rayne
and haye: the xiii. of June aforesayde
in the moorninge cloudye, in the after
noone sayre, but somewhat to hotte, the
xiiii. of June aforesayde somewhat
wyndy in the moorninge, and the same
wynde is lyke to continue all the same
day, the xv. of June aforesaid cloudye in
the forenoone, but after noon faire and
somewhat hot wether: The xvi. of June
aforesaid in the morninge ther shall be a
litle swete dew of raine, p xvii. of June
in the moorninge somewhat wyndy, but
faire wether with whyte cloudes, but
at tenne a clocke cloudye and close, and
at after noon: and specially that nyght
somewhat hotter then it was before:
the xviii. daye aboute the after noone
wyndye somewhat hotter then before:
The

The. xix. sayze and at nyght very hote,
 the. xx. aboute. ii. of the clocke at after
 noone some swete dewe of rayne shall
 falle, but very lyttell to speake of: all
 the reste of the day it shall bee wyndye
 and all the nyght also: The xxi. altoget-
 her cloudye. The xxii. sayze and hote,
 but aboute mydnyght a lyttell swete
 shower of rayne. The xxiii. daye faire
 weather and somnewhat hoate. The
 xxiiii. a sayze daye. The xxv. day sayze
 weather, but some cloudes, byngynge
 with them some dewe of rayn. But the
 xxvi. day in the moynynge cloudy, and al
 the nyght folowynge very hoate: The
 xxvii. daye in the after noone wyndye,
 with whitythe cloudes sparkeled about
 the heauen: The xxviii. day windy and
 cloudy: The xxix. fairer weather, and
 somnewhat hotter then before: The
 xxx. day wyndy wether, and temperate
 and sayze.

July.

The first of July shall be a cloudy
 and moyst daye, the seconde daye
 sayze and very hoate. The thirde
 temperate. The folwerthe berpe hoate.
 The

The fifteth daie temperate, and at night
cloudie and close wether. The sixt daie
colde and rain. The seventh daie hotte
wether & faire. The eight to rain some-
what disposed, and thesame weather
shalbe the ninth daie as the eight daie
The tenth faire and temperatly hotte,
but in the after noone Cloudie. The e-
leventh daie colde and moist, but about
foure of the clocke, the twelventh day afore
noone it will breake vp, and bee a faire
and temperate hotte daie, till after thre
of the Clocke in the after Noone, then
will bee cloudie wether; the thirteneth
daie somewhat enclined to moiecture,
but it is to bee feared least thesaied en-
clination bee annihilate thzough the
applicatio of Mercurie to Jupiter, be-
yng in a temperat mansion, the four-
teneth windie, and faire temperate we-
ther, but aboute the Sunne setting
cloudie, and so all that night, the fiftene
daie somewhat disposed to moiecture,
the sixteneth, the weather faire and a
hotte after noone, the seuenteneth daie
windie and temperate, the eighteneth
saier wether, and more windy then be-
fore, the nineteeneth temperate, some-
what colder weather then before, the
twentie

twentiethe daie a temperate daie, the. xxi.
 daie windie and redde, and whitthe
 cloudes, sparkeled aboute the heauens,
 and at night lightenyng, the. xxii. encli-
 ned to moiest the. xxiii. somewhat clou-
 die, the. xxiiii. a faire hotte daie, because
 of the cozpozal coniunction of Sol and
 Mercurius in the fier signe of Leo, the
 xxv. daie cloudie, and aboute nine of the
 clocke at night, very hotte, the. xxvi. daie
 faire, the. xxvii. daie cloudie, the. xxviii.
 daie temperatly faire, the. xxix. windie,
 the thirtie, a temperate daie, the same
 wether the. xxxi. daie.

August.

The first daie cloudie, the second
 a faire temperate daie, and after
 Noone and at nighte very hotte,
 the thirde a faire hotte daie, the fowerth
 daie a temperate daie, the. v. daie faire
 and hotte in the fore Noone, but after-
 wardes somewhat enclined to moisture
 the sixth daie in the moznyng faire, and
 at after noone cloudie, the seventh faire
 and temperate in the after Noone, and
 at nighte somewhat enclined to moie-
 sture, the eighth daie a faire moznyng,
 and all daie. The ninth very windie.
 And

And the tenth somewhat enclined to
colde and moiesture: the eleventh daie,
faire wether & temperate: the twelue
some rain, or els the thirteneth daie: the
fowerteneeth daie faire and somewhat
windie: The fifteneeth daie cloudie and
windie in the after noone: The sixtene
daie faire: the seuentene daie cloudie and
looke as though it would Raine, and it
shall not: the eightene faire wether, and
somewhat windie: the nineteneth clou-
die, and after midnight faire and win-
die: the twentieth daie temperate dry we-
ther: The one and twentieth, windie and
cloudie: The twoo and twentieth in the
mornynge, faire and pleasaunt: the thre
and twentieth daie hotte and faire wea-
ther: the fower and twentieth faire wea-
ther, and a pleasaunte still winde. The
fue and twentieth, sixe and twentieth, seue
and twentieth, faire weather, and greate
windes: The eighte and twentieth, more
hotte then befoze, and also more windy
the nine and twentieth daie faire wether,
thesame the thirtie daie also: the thirtie
and one, a faier and a hotte daie.

September.

The

The first daie a faire daie: the se-
conde daie faire in the moorning,
but in the after Noone colde and
rain with some haile withall: the same
weather with some winde, and tempe-
rately cloudie, also the thirde daie: the
fowerth somewhat enclined to moisture
in the after noone, but in the moorning
it shalbe temperatly windie: The fiveth
a colde cloudie afoze Noone, but in the
after noone temperatly windie, & faire
temperate wether. The sixe daie some-
what windie, but towarde night, clou-
die, and enclined to moisture. The se-
uenth daie, cloudie in the moorning, and
somewhat colder then befoze, but in the
after noone, it will not be so colde as be-
foze: the eight windie, the ninth a tem-
perate cloudie daie. The tenth daie cold
and cloudie. The eleuenth cloudie and
temperate, and towarde night, clerer
wether and fairer wether then befoze.
The twelue daie somewhat windie.
The thirtene enclined to colde and
moisture, but aboute ten of the clocke
afoze midnichte it will breake vp, and
be faire and drie the nexte daie The fif-
tene cloudy & cold, somewhat more then
befoze, but towarde night, the cloudes
will

will breake vp, and it will bee al nighte
 faire, and sirtene windie, and the seuen-
 tene in the moorning moze windie, but
 at after Noone colde and cloudie. The
 eightene daie faire weather. The nine-
 teneth daie windie. The twentieth clou-
 die in the fore Noone, but towarde
 night faire. The one and twentieth, faire
 weather and drie in the moorning, but
 after Noone colde and moist, and a-
 bout the hower of five at after Noone
 somewhat temperately windie, and so
 all night long. The twoo and twentieth,
 temperate wether. The thze and twen-
 tie faire weather. The xxiii. Cloudie.
 The fve and twetie, very windie. The
 xxvi. faire and windie. The xxviii. great
 windes and faire weather. The eighte
 and twentieth faire weather. The nine
 and twetie, somewhat enclined to rain.
 The. xxx. cloudie, and somewhat windy

October.

The first daie fairer wether, and
 somewhat windie. The second
 daie Raine in the fore Noone,
 but I thinke the fertile aspecte
 of Mars and Jupiter, will make the
 after noones wether faire. The third in
 the

 day in the moornyng somewhat faire,
 and wyndy. The xxxi. cloudy, and some-
 what wyndy.

The

The. vii. Chapter of the infirmities that shall bee in the aforesaid pere of our Lorde.

M.D.liiii. and in every quarter thereof.

The standing of Sol in the firste of Aries, and in the firste house of the heauens, signifieth that the infirmities, which shall happen in the firste quarter of the pere aforesaid, shall be in the heddes of men, as madnesse, and other hotte infirmities aboute the brain, because that he is Lorde of the first house, whiche house signifieth of his owne nature, diseases, and infirmities. More ouer Mars the sanguinolent planer, beyng in the firste house, at the tyme of the Eclipse of the Sunne, signifieth that there shall be many hotte and drie agues, as Tercians, whiche come of corrupt bloude, and colour superabundante, in the seconde quarter of the pere abouesaid, and many diseases, whiche shall happen in mennes Neckes also in the said quarter, whiche shall rise of corrupt bloude and choler superabundante in the seconde quarter

quarter of the yere abovesaid, and many diseases, whiche shall happen in mennes neckes also in thesaied Quarter, whiche shall arise of corrupte bloudde, and pustules, and antraces, and peines in mennes eares also. And in the thirde Quarter of the yere abovesaid, there shall be many diseases raignyng in the raines, and in the secret places, because of Venus, beyng impedit in the reuolution figure in the sicke house, and that in the signe of Scorpio. Finally in the fowerth quarter of the yere abovesaid there shall be many diseases in the yies, and in the belies of menne, and women and in their neckes, shoulders, and armes, many infirmities.

The. viii. Chapiter of warres, and contencions.

If Soll in the first house, and in his exaltacion, signifieth that the seruile and ignoble people will hate their nobilitie, and will looke to exalte them selves against them, and that in the first Quarter of the yere abovesaid, and Saturnus in the signe of Pisces, & princely planete Jupiters house, mingled with the beames of  the

the Sanguinolent signifieth that there
shalbe bloudshed among noble menne,
and greate contencions, whiche shal at
last be pacified by noble men of religio
in the nexte quarter of the yere. Mars
in Gemini a mannely signe, signifieth
manslaughte, and in the thirde quar-
ter, Mars in Leo, and in the fowerth
house, signifieth contencions, and that
many shal in that reuolucion come to
their end by the sword. Finally Mars
in the fowerth and laste quarter, signi-
fieth bloudshed, and warres, because he
is in ♀ whiche is a Signe of humaine
forme, & in the twelue house, the house
of enemies and contencions.

¶ The. ix. Chapiter of Cattall,
and all other thynges, whiche
serue for Victualles, as
wheate, barley, Bea-
nes, & suche like.

¶ First in the first quarter, Mars
beyng Lord of Aries, combust
in Disces, and impedit with
thenuious beames of Saturne
signifieth death of shepe in that reuolu-
cion aforesaid, and Mars in the face of
♈. Taurus

Taurus, in eight Sphere Impedite, signifieth death of Kine in the seconde quarter of the yere aboue sayd. Venus also in the revolution of the thirde quarter of the yere aforesaid, in the first house beyng Lady of Taurus, signifieth that Kine shall haue many infirmities. Moreover, in the fowerth quarter Venus the Ladie of the signe of Taurus, beyng in the sixth house, whiche is her ioye, signifieth that Calues, Kine, and oxen, shall prospere well that last quarter, we heate in the first quarter shalbe but of metely lowe price, but in the ende of the firste quarter, aboute Whitson-tide, it shall arise vp to a more higher price. Barleie shalbe of a vile price, to speake of, in the beginning of the firste quarter, that is to saie, in Marche, but in Aprill it shal arise in price more. Beanes shalbe of a metely reasonable price in the firste quarter aforesaid. Wines shalbe of a meane price, and hony shalbe of a lower price, then it hath wont to bee. Many apples this yere shalbe, specially of Sweetynge, and such like. Moreover in the second quarter wheat shalbe of meane price, and very litle of it the said quarter. Barleie in the se-

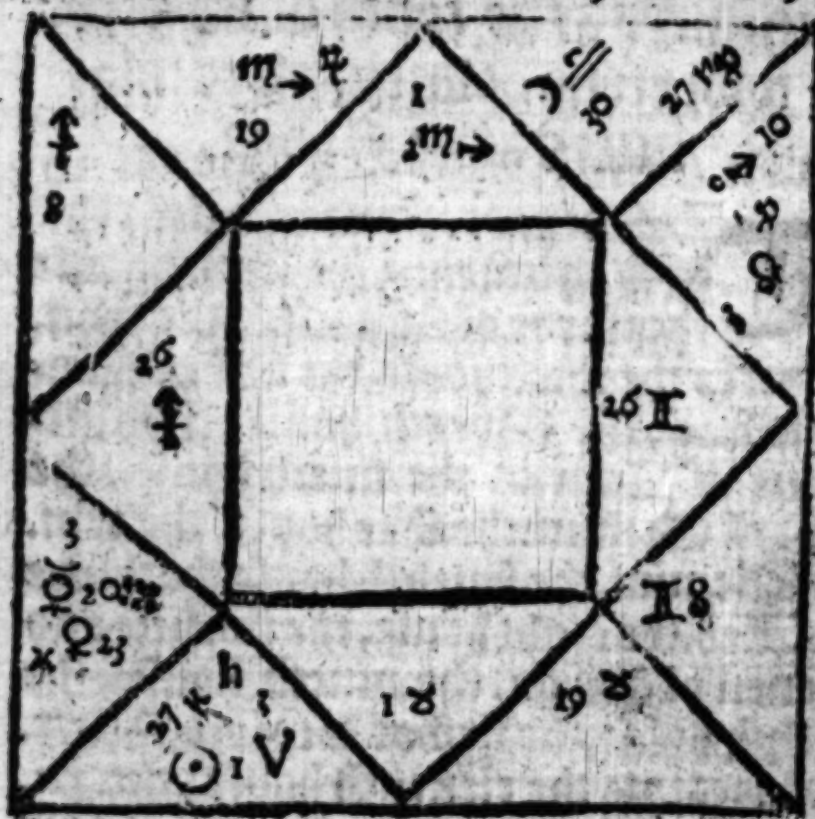

conde

sonde quarter shalbe of a greate price,
 and this Harvest therof no great plen-
 tie. Beanes shall bee of a greate price,
 this seconde Quarter, and litle store of
 them this Harvest. Muche hony shal-
 be this Somer, and more good cheape
 then it hath been. Also there shalbee no
 store of grapes this yere, and there shal
 be very fewe Nottes this yere.

The figure of the firste quar-
 ter Astronomicall, of the yere of
 our Lorde, a.M. CCCCC. A.v.

 in the thirten of Aries, in the twelf
 house, Jupiter the twentieth and fower of
 Libra in the twentieth and fower of Li
 bra in the first house. Mars in the twen
 tie and two of Virgo in the fift house
 Venus in the ninth of Taurus in the
 twelue house of the heanens. Mercuri
 us in the first of Gemini in the first
 house, and orientall, whom I perceiue

to bee lord of this forsayde Eclipse of
the Moone, who goeth to the Dextre
aspecte of Saturne, Lord of the house
of honour, who being impedit, and in
the Hygne of Aries his falle, because
it is apposite to Libra his exaltation
signifieth a meruailous depression and
falle of a great man of honour.

And as for diseases and infirmities
there is none almoste by this Eclipse
signified, but colde reumes and suche
lyke moysture in mens heades, wher
the diseases Jupiter in the syxt house
wylt with his corporall presence much
mitigate.

The site of the heauens at the se-
conde quarter Astronomicall of

 house, Mars in the seconde of Aquari-
 us in the seconde house, Venus in the
 twentie and eight degree of Sagitarie
 in the first house, Mercurius in the .xir.

of Capricorne in the seconde house, I
take of this reuolacion, Luna to be the
chiefest ladie, who committeth her dis-
position to Venus, Ladie of the fertile,
beyng in the ascendent, with a conjunc-
tion copozal, whiche signifieth that we
shall haue many infirmities in these
thies and armes in this reuolucio, and
the wether shal be teperate, with some-
tyme milde driselyng rain.

The particular declaracion of
the wether for this presente yere.
Anno. Domini. 1555.

January.

The first daie in the after noone
rain and windte, the secod daie
rain all the after noone, and at
night also, the thirde daie ruddy
cloudes, with blacknesse mingled with
all and rain, the fowrth daie in the af-
ter noone, and after greate Rain, and
almoste all the nighte long, Rain also,
the fineth daie towarde Nighte faire
weather, but the daie aforesaid shal
bee Rainie, because of the Fertile as-
pecte of Sol to Saturne, thei bothe
beyng in moste mansions, the sirte daie
somewhat enclined to rain, the seventh
daie

daye somewhat ruddie cloudes, & blacke
hells mingled with the, bringyng some
rain. The eight daye faire weether, and
toward night windie, and rain. The ix.
daye rainie. The tenth daye in the after
noone faire, and somewhat windie.
The eleuenth daye at after noone rain.
The tweluth in the morning faire we
ther. The thirtenth at after noone rain
The fourtenth a temperate daye, the
fiftenth a faire daye in the after noone
but about the fore noone, and the night
afore rain, and windie weether shalbee,
the sixtenth somewhat inclined to rain,
the xvii. in the morning somewhat faire
but red cloudes coueryng the heauens,
shal bring some rain after noone. The
xviii. daye, because of the quart aspect of
Jupiter and Mercurius, shalbee verie
windie. The. xix. daye somewhat drisse
lyng and rainie; the. xx. daye white and
lead cloudes, bringyng with them sho
wers of rain, the. xxi. the same weether:
The. xxii. daye windie and faire, in the
fore noone the. xxiii. daye cold and moist.
The. xxiiii. daye blacke cloudes, rain and
windes also, the. xxv. daye cold & rainie,
because of the copozall coniunction of
Saturnus and Venus, in the signe of
D. iiii. Pisces

Disces, the twentieth and first day colde
and moiest, the twentieth and seven day
towards night rain, and some windi-
ness in the aire, the twentieth and eighte
day winde and faire weather, the xxij
day faire wether. The thirtieth day rain
and blacke cloudes, with cold weather.

February.

The first day colde and moiest.
The seconde day somewhat en-
clined to moisture, the third day
in the after noone somewhat faire, but
at night, and specially after midnight
windie, and somewhat enclined to rain,
the fourth afoze noone, somewhat en-
clined to moisture, but after none faire
wether, the fiveth day rain, specially a-
bout noone, and at one of the clocke, be-
cause of a Sextile aspect betwixt Sa-
turne, and Mercurius, the sixt day, be-
cause of the apposition of Sol and Lu-
na in Aquarius, and Leo, whiche bee
rainy signes rain, the seventh day some-
what enclined to moisture, the eighth
day a faire day, because of the conjunc-
tion Copozall, of Luna and Mars, in
Virgo a drie signe, the ninth day rain
with winde, the tenth day very windie
because

because of the quarte aspect of Mercurius to Jupiter retrograde, the eleueth rain with winde, the twelue windie and faire whitthe. Cloudes aboute the heauens, because of the trinall aspect of Sall and Jupiter retrograde. The thirtene daie in the moornyng faire wether. The fowertheneth at noone somewhat enclined to moisture, and after noone moze enclined to rain then afoze. The fiftene daie a faire daie, and red aboute the cloudes sparkled aboute the heauens, the sixtene daie about after none, rain, the seuentene daie at after noone faire weather. The eightene at after noone rainy. The ninetene windie and rain a litle, the twentieth towarde night windie, the twentieth and one, aboute eleven of the clock afoze noone rain, but towarde night faire weather, the .xxi. towarde night, cloude and rain, the .xxii. because of the apposition of Sall and Mars, faire wether, and red cloudes, bringyng with the some rain sometimes, the .xxiii. because of the coniunction of Saturne & Venus, in the moist mansion cold wether, and rain, the .xxv. daie faire weather, the .xxvi. daie rain and windie the after noone. The .xxvii.

D. b. daie

Disces, the twentieth and firste daye colde
and moiest, the twentieth and tenen daye
towards night rain, and some windi-
nesse in the aire, the twentieth and eighte
daye winde and faire weather, the xxi
daye faire wether. The thirtiye daye rain
and blacke cloudes, with cold weather.

February.

The firste daye colde and moiest.
The seconde daye somewhat en-
clined to moisture, the third daye
in the after noone somewhat faire, but
at night, and specially after midnights
windie, and somewhat enclined to rain,
the fourth afoze noone, somewhat en-
clined to moisture, but after none faire
wether, the fiveth daye rain, specially a-
bout noone, and at one of the clocke, be-
cause of a hostile aspect betwixt Sa-
turne, and Mercurius, the sixt daye, be-
cause of the apposition of Sol and Lu-
na in Aquarius, and Leo, whiche bee
rainy signes rain, the seventh daye some-
what enclined to moisture, the eighth
daye a faire daye, because of the conjunc-
tion Corporall, of Luna and Mars, in
Virgo a drie signe, the ninth daye rain
with winde, the tenth daye very windie
because

because of the quarte aspect of Mercurius to Jupiter retrograde, the eleuenth rain with winde, the twelvethe windie and faire whitte. Cloudes aboute the heauens, because of the trinall aspecte of Sol and Jupiter retrograde. The thirtene daie in the moornyng faire weather. The fowertene at noone somewhat enclined to moiesture, and after noone moze enclined to rain then afoze. The fiftene daie a faire daie, and readye with the cloudes spackled aboute the heauens, the sirtene daie about after none, rain, the seventene daie at after noone faire weather. The eightene at after noone rainy. The nineteene windie and rain a litle, the twentieth towarde night windie, the twentieth and one, aboute eleven of the clock afoze noone rain, but towarde night faire weather, the .xxi. towarde night, cloude and rain, the .xxii. because of the apposition of Sol and Mars, faire weather, and red cloudes, bringyng with the some rain sometimes, the .xxiii. because of the coniunction of Saturne & Venus, in the moist mansion cold weather, and rain, the .xxv. daie faire weather, the .xxvi. daie rain and windie the after noone. The .xxvii.

D. v. daie

daye somewhat faire at the after noone
and towarde night, p. xxviii. daye rain.

Marche.

The first daye windie with a litle
driselyng Rain, the. ii. daye some-
what rainy wether, the third daye
rainie wether, the fourth and. v. rainy
because of the coniunction copozall of
Venus and Sol, in the watric signe of
Pisces, p. vi. daye towarde night faire
red cloude, and winde with a litle rain
the. vii. in the after noone somewhat re-
perate wether, the. viii. cloude & moile
wether, the. ix. temperate wether, the. x.
daye white cloude aboute the heauens
sparkled, the. xi. because of the conjunc-
tion of Venus & Mercurie in the wa-
teric signe of Pisces, rainie and windy
the. xii. also the same wether, the. xiii. clou-
die, cold wether, rain and haile, because
of the copozal coniunction of Sol, and
Saturnus that daye, the. xiiii. towarde
night, and at night rain. xv. somewhat
inclined to rain, the. xvi. in the morning
somewhat faire wether, the. xvii. & xviii.
rainie wether, because of the conjunc-
tion of Saturne & Mercuri, the. xix. daye,
somewhat faire wether, the. xx. daye faire
wether,

whether, the. xxi. in the morning rain, be-
 cause of the coniunction of Luna, and
 venus in Sifres a watry signe, the. xxi.
 at morning cloude, but it will breake
 up at after noone, the. xxii. daie windie,
 specially at night, the. xxiii. some what
 ruddy cloudes, bringing with the some
 rain, the. xxiv. in the morning some drif-
 ling rain, the. xxv. aboute noone, cold &
 cloudy, the. 27. faire before noone, but in
 the after noone it is like to rain some what
 but a litle, the. xxviii. daie aboute noone
 windie, but towardees night therewith
 cloude, the. xxix. after noone a litle rain,
 the. xxx. daie about after none very win-
 dy, the. xxxi. daie greete windes, because
 of the opposition of Jupiter & Mercur.

April

The first daie faire, the second daie
 windie, and at after noone hotte,
 the third a faire daie, but towar-
 des nighte somewhat enclined to rain,
 the fowerth daie faire, and temperate
 whether, because of the coniunction co-
 pozall of Jupiter & Luna, in Libra, an
 airie signe, the. v. in the morning cloudy
 the. vi. a faire daie, specially in the after
 noone, the. vii. daie a faire after none, &
 somewhat hotter then before, the eight
 daie

daie, and speciall in the morning, windie,
 & after somewhat enclined to cold-
 nesse, and moisture in the after noone,
 and the same night also, the ninth daie
 somewhat a faire daie and very windy
 with white Cloudes sparkled about
 the heakens, because of the opposition of
 Sol, and Jupiter in a fierie and airie
 signes, the tenth in the morning cloudie
 the eleventh somewhat enclined to rain,
 the .xii. daie, a faire morning, but after
 noone colde and cloudie, the .xiii. daie a-
 bout after noone windie, the .xiiii. about
 the rising of the sunne faire, and tempe-
 rate, the .xv. faire and hotter then before
 because of the trinall aspect of Sol and
 Mars in yearthly signes, the .xvi. in the
 morning windy, and after noone faire
 and somewhat hotter then before, the
 .xvii. somewhat driselyng rain, because
 of the coniunction of Venus and Luna,
 in Pisces, the .xviii. daie cold, and clon-
 die the moste part of al the daie & night
 also, the .xix. daie faire, and temperate
 wether, the .xx. also faire, and somewhat
 enclined to sweete raine. The .xxi. the
 same wether, the .xxii. drie temperate
 wether, & .xxiii. daie a metely faire daie
 The .xxv. in the morning a faire daie,
 but

but after colder and cloudy: The xix. day
windy and fayre weather: the xx. cloudy
and temperate weather: the xxi. fayre
fayre weather, but somewhat windy and
cloudy, because of the fertile aspect of
Saturnus, and Mercur. the xxii. a fayre
and hotte weather all the nyghe longe,
because of the conjunction of Mars and
Luna in Virgo: The xxiii. day in the
mornynge somewhat wyndy, and after
noone sometime sweete houres, but
molte parte fayre weather,

Maye

The first day a fayre temperate day
the second day cloudy and some-
what inclined to moisture, but it
is lyke to holde up, not with standynge
because the significators of this rayne
bee in temperate mansions, and the
moon also. The third day fayre weather
and windy, because of the conjunction
of Jupiter and Luna in Libra an ayr
signe. The. iiii. somewhat cloudy a some-
tyme rayne. The. v. day colder, because
of the conjunction of Saturnus & Me-
rcur in the signe of Aries: The vi. windy
and raynye weather, because of the
quart

quart aspect of Mars and Mercurius
and the fertile aspect of Venus and
Mercurius the saye vi. day, The vii.
windie and cloude til night, but in the
night aboute. viii. of the cloke some what
faire wether, and about x. of the cloke
some what inclined to moisture. The
viii. day some what faire wether. the. ix.
day cloude wether, and the tenth day
in the morning some what inclined to
moisture, but at after noone spectallye
towards nyght faire wether and some
what windie. The xi. day swete showers
of raine. The xii. day in the after none
faire wether. The xiii. faire and windie
The xiiii. day red white cloudes, some-
tyme some moisture. The. xv. day wyndy
with sometymes raine a lytle in a
quantitie, The xvi. day rote and cloudy
with cloudes troubling the heauen like
to bring some raine, but it wyl hold by
as it is afoze saied. The xvii. a faire day
the xviii. some what faire wether. The
xix. some winde and raine. The. xx. day
faire wether, but towards night clou-
die. the xxi. day because of the opposition
of Jupiter and Venus in Aries & lib. a
faire temperate day with white clou-
des sparkeled about the heuens. The
xxii.

day cloudie. The xxiij. daye colde and
 cloudie also, because of the sevrile aspect
 Saturne and Sol. The xxiiii. day clou
 die and somewhat inclined to moisture
 The. xxb. day cloudie, but about thre of
 the clocke at after noone it will some
 what breake vp. The xxvi. in the after
 noone wyndie and metely faire wether
 the xxvii. a faire day, and the xxviii. daye
 also the xxix. cloudie. The xxx. day a mete
 ly faire day. The xxxi. day faire wether
 and wyndie.

June.

The first day a false boote daye
 because of the quarte aspeete of
 Mars, and Sol. The second also
 the same wether, the thirde daye
 wyndie and cloudie. The. iiii. day a fait
 day, the v. day a faire day & wyndie, the
 sext day inclined to moisture, the seuenth
 day inclined to wynde. & viii. daye some
 what inclined to raine, the nynti faire
 wether and somewhat wyndie. the tenth
 day in the fore noon wyndie, the xi. in
 the after noone faire temperate wether
 The xii. wyndie and cloudie. & xiii. daye
 faire wether and wynde, the xiiii. daye
 cloudie

cloude: The xv. day sweete showers of
 small-raine: but towards night and at
 night long it will be faire and breake
 by: The xvi. day cloudy, the xvii. windy
 bycause of the coniunction of Luna &
 Mercurius in Gemini: the xviii. a fayre
 temperate day: The. xix. a colder daye
 then before, and cloudy also: the xx. in
 the mornynge faire wether and also win-
 dy: The xxi. day cloudy: the xxii. to-
 wardes nyght windy: but at the mooste
 parte of the day metely faire: the xxiii.
 day somewhat cloudy wether: the xxiiii.
 inclined to moisture, the xxv. day white
 and red cloudes sparkled about the sky
 with wynde, bringyng with them some
 rayne: The xxvi. cloudy and colder then
 before: The xxvii. a faire windy day, &
 the xxviii. also: The xxix. somewhat clou-
 dy: The xxx. fayre wether.

July.

The firste day cloudy, the seconde
 day cloudy, and that because of
 the quarte aspect of Saturnus &
 Mercurius, the third day a fayre daye
 all the fore noone, but in the after noon
 cloudy. The fourth in the after noone
 somewhat rainy, and towards nyght
 fayre

faire wether, the .v. a faire daye, but
 because of the fertile aspect of Saturnus
 and Venus the heuen shall be ouer
 cast with cloudes like to brynge some
 rayn, but notwithstanding it will be as
 is aforesaid a faire daye. The sixt a
 metely fair wether. The seventh a mete
 ly temperate wether, the eight daye a
 faire day with great wynde and white
 cloudes couering almost the heauens,
 and this because of the quarte aspect of
 Sol and J M P J A E A, & M A A.
 C M A J M S quarte aspecte to Ju
 piter also. The ix. a faire day and a hote
 but that temperately, because of the ap
 plication of Luna to Saturne. The
 tenth day a metely faire day in the after
 noone. the xi. somewhat inclined to moi
 sture and the xii. day also, the xiii. some
 raine is lyke to happen, but the most of
 the wether shall be temperately cloudie
 the xiiii in the afternoone cloudie, the xv
 temperate wether and cloudes in the
 skye lyke vnto the scales of yzon, the xvi
 day sayre temperate wether, The. xvii
 somewhat faire wether, the xviii. day
 cloudie, the. xix. daye a faire daye and
 somewhat wyndye, the. xx. daye some
 what moiste weather, the. xxi. daye

A. i.

tem

temperate wether the xxiij. day temperate wether, the xxiiij. a faire hotte day, specially in the after noone: the xxv. in the moorning wyndy, the xxvi. faire wether: the xxvii. a faire daye, the xxviii. somewhat cloudy but drie wether: the xxix. fayre wether: the xxx. windy: The xxxi. somewhat enclined to drislynge swete raine.

August.

The first day faire wether because of the application of Mars to Jupiter in the signe of Lib: a, the second day cloudy all the moore part of the day, but at night faire clere wether, the nyth day faire in the moorning specially, and almoste all day, the folwerth in the after noone enclined to som rain, the fiveth somewhat enclined to moisture: the sixte a fayre day, and whitish redde cloudes sparkeled about the heavens, and sometimes not withstanding cloudy, and that bycause of a quart aspect betwixt Luna and Mars, and of a copozall conjunction of Saturnus and Luna, the seventh day faire wether, and windy, the viij. day somewhat faire wether:

wether: the nyght at after noone faire
 and hote: the tenth cloudy: the xi. a mete
 ly faire day: the xii. a faire temperate
 wyndy day, bicause of the fertile aspect
 of Sol and Jupiter: the xiii. a temperate
 day: the xiiii. in the moorning about
 vii. a clocke faire: but about ix. a clocke
 somewhat enclined to rayne, and after
 noone faire wether: the xv. somewhat en
 clined to cloudines: the xvi. a temperate
 wether: the xvii. faire and hote wether:
 the xviii. fait temperate wether: the xix.
 wyndy: the xx. cloudy: the xxi. day faire
 and temperate weather: the xxii. a faire
 day: the xxiii. a faire day, bycause the fer
 tile aspect of Sol and Mars: the xxiiii.
 cloudy: & lyke to rayn: the xxv. somewhat
 enclined to moisture: the xxvi. windy, the
 xxvii. cloudy, but towarde night, faire
 wether: the xxviii. somewhat enclined to
 wynde: the xxix. somewhat more clou
 dy then before: the xxx. metely faire: the
 xxxi. faire and hote.

September.

The first day somewhat windy: the
 second day cloudy, and cold we
 ther: the thirde day a temperate
 day somewhat cloudy lyke to
 E.ii. raine

raime, but it will holde up as before said
the .liii. faire wether, but sometime red
cloudes bzinging with them some rain
the v. days metely faire wether, and
temperat and drye, the vi. cloudy, the vii.
faire, and temperate, the viii. metely
faire, the ix. faire, and that in a tempe-
rate mansion also the x. the same wether
the xi. cloudy, the xii. faire because of the
quarte aspekte of Mars to Luna, and
the sextile of Venus to Jupiter, the xiii.
a faire temperate daye, the xiiii. faire &
windie, and that because of a sextile be-
twixt Mars, and Mercurius. The xv.
faire, the xvi. colde and cloude. the xvii.
somewhat eclined to moisture, & xviii. faire
temperat wether, because of the coniunc-
tion of Luna, and Jupiter in Scorpio &
house Mars, the xix. windie, & xx. a faire
daye because of the corporal conjunction
of Luna & Mars in Scorpio, with some-
times redde cloudes bzingyng with the
some raime, the xxi. Cloude, & xxii. some-
what windy. & xxiii. til it be past iii. clock
in the after none windie but afterward
because of the Sunnes opposition with
Saturnus colde, & cloude: & xxiiii. daye
somewhat enclined to moisture, & xxv.
faire wether, & xxvi. cold, and cloudy the
xxvii.

the xxv. and seven metely faire. The
xxvi. and eight, temperate weather, the
xxvii. temperate and windy, the xxviii. faire

October.

The first date metely faire weather
the ii. date enclined to moisture,
The iii. a temperate date, the iiij.
temperate, but somewhat cloudie, because
of the trivall aspectte of Saturnus and
Mars in fierie signes, the v. a temperate
date, the vi. metely faire weather, the
seventh date a temperate weather, the
eight date somewhat temperate, and to
wardes night windie, the ninth date a
temperate date, and blacke cloudes like
to bring some rain, but it shall hold by,
because of Saturne and Venus, the ii.
significatours of this moisture, bee
bothe in the temperate Mansions, the
tenche metely temperate, the eleventh
date faire weather, the twelfth because
of the sextile aspectte of Mercurius and
Mars, one in an airie signe, an other
beyng in a fierie signe, the thirtene day
rolde and cloudie, the fourtenth tem-
perate, with an inclination to moisture
the fiftenth faire in the after noone, the
sixtene enclined to moisture. The xvii.

E.iii.

some

Somewhat enclined to droughte aboute
 bed, theightene toward euening, faire
 white and red cloudes, with wether al-
 so, the nineteenth a faire date, the twentieth
 date metely faire wether. The. xxi. date
 temperate wether, the. xxii. temperately
 windie. The. xxiii. faire, and somewhat
 windie, the. xxiiii. in the morning faire,
 and in the euening cloudes like to rain
 but it will holde by, because Venus the
 significatrice of this rain, is a good tem-
 perate mansion, the. xxv. faire and windie
 the. xxvi. faire wether, till twon a clocke
 in the after noone, but afterward very
 colde and cloudie, the. xxvii. a faire tem-
 perate date, the. xxviii. greete windes &
 white cloudes aboute the heauens, the
 xxix. date towards night windie, the. xxx.
 greete windes, because of the coniunctio
 of Mercurius & Jupiter, the. xxxi. cloudie

November.

The first date faire wether, the. ii.
 cloudie aboute noone, till three a
 clocke, and then metely faire we-
 ther, the. iii. date, because of the coniunc-
 tion of Mercurius and Sol in a moist
 signe, and a moist mansion also, signi-
 feth rain with some wind, the. iiii. clou-
 die,

die, the .v. and .vi. faire weather, the .vii.
 faire and temperate, the .viii. temperat,
 and in deede neither faire nor foule, the
 ninth milde Rain, because of the con-
 junction of Jupiter, & Venus in Scor-
 pio, a moiest signe, and a moist mansiō
 also, the .x. daie rains haille, or els some
 snowe withall, because of the quarte of
 Saturnus & Mars in moist mansiōs, &
 same wether most part of the next day,
 the .xi. day somewhat enclined to gentle
 & small rain. The .xii. daie the same we-
 ther, the .xiii. cloudie. The .xiv. enclined
 to moiesture. The .xv. cloudie in the af-
 ter noone. The .xvi. faire weather and
 froste. The .xvii. a faire drie daie from
 rain. The .xviii. cloudie, because of the tri-
 nall aspect of Saturnus and Sol. The
 .xix. in the after Noone like to rain, but it
 will holde vp. The .xx. somewhat clou-
 die. The .xxi. faire in the fore noone. but
 in the after noone windie, the .xxii. clou-
 die, the .xxiii. faire wether, the .xxiv. clou-
 die, and as though it would rain, but it
 will holde vp, because Saturne & Ve-
 nus (whose trine aspect causeth the we-
 ther aforesaid) be in fierie signes, & tem-
 perate mansiōs. the .xxv. faire, the .xxvi.
 cloudie, the .xxvii. metely faire, the .xxviii.

E. liii.

some

Somewhat cloude, the .xxx. metely faire

Decembze.

The first daie cold and rain with
all, because of the quart aspect of
Saturnus and Mercurius in a
moiest mansion. The second daie some-
what enclined to moisture, the thirde
faire wether and white cloude spark-
led about the heauens, the fourth faire
and temperate wether with some wind
the fifth somewhat enclined to moist-
ure, the sixt in the morning faire, and
all the moste parte of the daie Cloude
and very colde, the seventh windie, the
eight in the after noone metely faire, the
ninth somewhat windie, the tenth more
windie, in especially at after noone, the
eleventh a metely faire day about noone
but afterwarde cloude, the twelfth
daie somewhat enclined to moisture,
the thirteenth daie metely faire wether,
but somewhat to much enclined to moi-
sture, the fourteenth daie cloude. The
fifteenth windie in the after noone, the
sixteenth faire daye daie, but towards night
cold and cloude, the seventeenth daie somewhat
faire wether, the eighteenth cold, cloude and
rain with some Snowe, because of the
quart

quart aspecte of Sol to Saturnus, and
a sextile of Mars to Saturnus, and a
quart of Saturnus to Venus. The. xix.
daie metely faire temperate weather,
with winde, about ten of the clocke, the
xx. daie colde and clondie, the. xxi. some-
what windie, and some Rain, the. xxii.
daie faire temperate wether. The. xxiii.
somewhat windie, the. xxiiii. in the morn-
nyng faire and windie, but afterwarde
clondie weather, the. xxv. a faire colde
daie, the. xxvi. daie clondie, the. xxvii. day
faire and temperate, the. xxviii. daie me-
tely faire, with often tymes sweete sho-
wers, and a litle winde. The. xxix. daie
windie, but after noone clondie, the. xxx.
a faire daie. The. xxxi. daie enclined to
coldnesse and moieture.

Of thinfirmities that shall
bee this presente yere.

Hirst Mercuri lord of the
house of diseases, in the first
beginning of the first quar-
ter, beeyng in the signe of
Bilces his fall, and in the
seconde cadent from the ascendent, si-
gnifieth that men shall have infirmi-
ties in their thynne bones, secrete pla-
ces

E. b.

res and Belies, and these diseases shall
happen moſte vpon boies, and olde wo-
men aboute the age of. lx. and vpon the
learned ſort of men alſo. Jupiter lord
of the houſe of infirmities directe, and
in the aſcendent of the ſeconde quarter
of the yere, ſignifieth that there ſhalbe
no infirmities in that quarter, but pei-
nes in the yies of men, and aboute their
knees alſo, whiche diſeaſes ſhall happen
moſte vpon noble men, and vpon yong
noble maidens alſo. Moreover Satur-
nus, beyng Lord of the houſe of infir-
mities in the thirde quarter, and impe-
dite in Aries, and in the ninth houſe ſi-
gnifieth, there ſhalbe quarterne agues,
whiche ſhalbe great, & reumes ſtillynge
out of mennes beddes into their Eigh-
tes, and trembling of Sinewes, and
peines in their knees and yies, through
corrupte bloude, becauſe Mars in the
ſigne of m. Finally, Venus in the ſo-
werth quarter, is figured Ladie of the
ſixt houſe, beyng in Sagittarius in the
aſcendent alſo, ſignifieth that men ſhall
haue no infirmities, but ſuche as
happen through ſurſettes of
drinckynge, and immoderate
venerious actes.

Of warres, and contencions.

Mars in a humain signe in theight
house, signifieth that mortal war
shall happen amongst men, and
the more because of his retrogradacion
this euill effecte and disposition shalbee
more vehement, and this shall appeare
more in the Southe partes, and in the
Easte partes, then in any other places.
Mars also in the seconde quarter of the
yere aforesaid, and in the .xxvii. of Vir-
go in the .xii. house, the house of enemies
signifieth warre and bloudshed Mars
in the signe of Scorpio in the .iiii. house
of the heauens, signifieth that many shal
be slain with the sword, and that in the
iii. quarter of the yere aforesaid. Finally
Mars in the .iiii. quarter, and in the
renouacion therof in the seconde house,
the house of substance, signifieth that
there shalbe great spoile of the ignoble
people by souldiours, and men of war,
because he is in Aquari, whiche signe is
the fall of the Sunne, and the house of
cloudie Saturne, whiche planete signi-
fieth diggers, and deluers of the yearth
and suche ignoble people and persones.

¶

Of Cattall, and all other thinges,
whiche serue for victualles,
as wheate, barley, beanes, and
suche like.

If Mars being Lord of the
right house impedit, signifieth
that in the first quarter of the
yere aforesaid, shepe shall die
much, and in the seconde quarter also,
more ouer in the third quarter. Mars
in Scorpio, signifieth that shepe shall
not die in the Revolution of the said
Quarter, and in the fourth and laste
Quarter, Mars in the seconde house,
signifieth that shepe shall not die, but
very fewe. Venus in the first quarters
Revolution, in the seconde house Re-
trograde, signifieth that wolles shall be
but of a merely lowe price in that quar-
ter, and Venus in the seconde quarter,
and in the eight of Taurus, and in the
right house of enemies, signifieth that
wolles shall be higher of price much
more then before it was in y first quar-
ter. And Venus in the seventh of Vir-
go, and the first house of the heauens,
at the revolution of the second quarter
signifieth

signifieth that wool shalbe verpe dere,
and higher of price then before. Moreover
in the .iiii. quarter of the revolution
of the yere aforesaid. Venus peregrine
in the ascendente, signifieth that there
shalbe greete plentie of woulle among
men, and it shal not be dere. Venus
Ladie of Taurus retrograde, signifieth
that Kine, or calves shal not prosper in
the first quarter but metely so, but in the
next quarter, Kynne and calves shalbe
of a good, and high price, and so also in
the third quarter of the yere aforesaid,
but in the .iiii. quarter Venus in the asce-
dente and impede out of all her digni-
ties, signifieth that the price of Oren,
Kynne, and Calves, shal fall in the said
quarter. Where in the first Quarter
lowe of price, and in the seconde quar-
ter within the which harvest falleth no
greete abundance of wheate, and in
that quarter it shalbe but of a low price
Moreover in the .iii. quarter, specially
ii. weekes afore Michelmass, wheate shal
be good cheape, and in the fourth quar-
ter lowe of price wyl wheate be. Bar-
ley shal be of a metely lowe price in
the first quarter of the yere. Barley
also in the seconde quarter of the yere
of

of a metely lowe pryce: but in this se-
conde quarter in the whiche harveste
falleth, there shal therof be good plentie
Barley in the thirde quarter shal be
good cheape. ii. weekes afoze St. Ighel-
masse, but about fouretene daies afoze
Hallowtyde beere agayne: but that
dearthe shal not longe continue.

Barley in the fowerth quarter of the
yeare meetely good cheape, and lyttell
of it amongst menne. Beanes in the
 fyrst quarter of the yere afozsaid good
cheape, and of lowe pryce. Beanes in
the second quarter of metely reasona-
ble pryce, and that somewhat of the high-
est, and of theim great plentie in this
seconde quarter. Beanes of a meetely
good pryce in the thirde quarter. Bea-
nes in the fourth quarter good cheape.

And generally for mooste thynges
necessary, this yere wil be plen-
tyfulle enoughe, specially
all the Somer, for all
the chiefe frutes of
the earthe.

Finis.
